

# Firestik 5-Way Mount for Antennas and Safety Flags

## Firestik Model SS-6

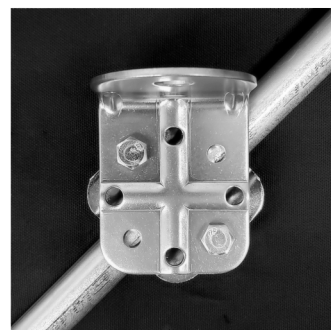

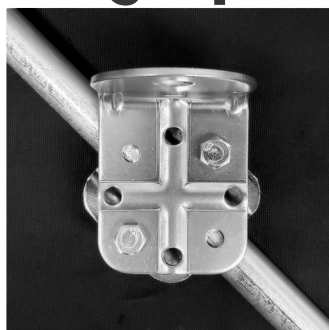

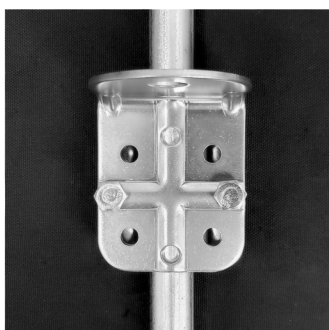

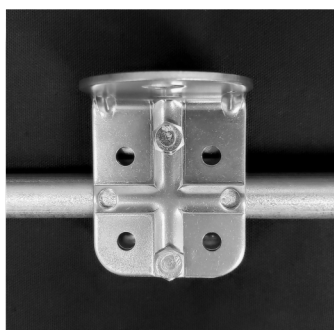

This Firestik redesign of an existing stamped part now allows for the mounting of antennas and flags to 45-degree angled bars. Formerly known as the Stainless Steel 3-Way Mount (horizontal bar, vertical bar, and vertical side), this improved 5-Way mount adds 4 new mounting holes to provide install options for both left and right side 45 degree diagonal bars.

The original bracket shape, thickness (12 gauge) and material (304 stainless steel) remains unchanged with this redesign. Each mount comes with stainless steel hardware, including 1/4"-20 thread bolts, lock washers and hex nuts.

Case: 24 pcs

## Now with 5 Mounting Options

- (1) Horizontal Bar   (2) Vertical Bar or  
(3) Vertical Side   (4) 45° Bar (left)   (5) 45° Bar (right)
