## Retractable Gear Attachment Systems

First engineered for SCUBA diving, the Gear Keeper is a rugged, retractable gear attachment system, designed to utilize and protect gear in **severe environments with maximum break strength and durability.**

The Gear Keeper is at the core of an extensive product line that boasts an impressive array of benefits and features: a **patented flushing system** that clears sand and debris from the unit, is **salt-water proof**, and will withstand **high-temperature** environments; a patented **Q/C Connector System** that provides quick and easy connection/disconnection of gear.

The **RT2 Series** features **60# break-strength**, stainless steel nylon coated cable and a high impact housing. The **RT3 Series** features **80# break strength**, Nylon/Kevlar line, and a high-impact housing. Both are available in multiple retraction forces and mounting options for any gear you need to keep handy and can't afford to lose (Lapel Mics, Flashlights, Knives/Seat-Belt Cutters...).

**Speciality product packages** combine the proper retraction force, attachment accessories and mounting options for specific applications. Or you can choose whatever force, mounting option, end type to create your own combination (Refer to RT2/RT3/RT4 Product Pages)

The original **Mic Keeper®** revolutionized communications for firefighters by making the lapel mic easy to use while avoiding the constant nuisance of having your mic drag on the ground or be inaccessible.

The innovative **Add-A-Clip®** product line gives the firefighter the ability too easily customize the turnout gear attachment points, eliminating the need for special sewn-on alterations.

**Grab your gear, use it, let it go — it retracts back every time!**

Gear Keeper makes whatever you're doing easier while preventing loss or damage to your valuable gear.
