Retractable Gear Attachment Systems

First engineered for SCUBA diving, the Gear Keeper is a rugged, retractable gear attachment system, designed to utilize and protect gear in **severe environments with maximum break strength and durability.**

The Gear Keeper is at the core of an extensive product line that boasts an impressive array of benefits and features: a **patented flushing system** that clears sand and debris from the unit, is **salt-water proof**, and will withstand **high-temperature** environments; a **patented Q/C Connector System** that provides quick and easy connection/disconnection of gear.

The RT3 series features **36 Kg (80#) break-strength** and Spectra/Nylon line. The RT2 & RT4 series features **27 Kg (60#) break-strength**, either **Stainless Steel nylon-coated cable** or **Spectra/Nylon line**, and a **high-impact housing.**

Gear Keeper's patented **360-degree Rotating Belt Clip** allows the retractor to rotate during use, reducing tension and line wear.

The **Stainless Steel belt clip** is built tough to survive severe and moist environments. In addition, the exclusive **interlock feature** prevents the Gear Keeper from becoming dislodged.

Combined, all these features make this one tough retractor.

The **Standard Belt Clip** fits belts up to 5,1 cm (2"). The **Extended Belt Clip** model fits Duty belts up to 5,7 cm (2¼").

The RT3 series is also available with a **Clamp-on Belt Clip** (fits up to 5,7 cm (2¼") belts) for high security, i.e. prison guards.

Law Enforcement Gear Keeper packages target applications ranging from Lapel Mic Keepers, Side Arm Tethers and specialized Key holder applications.
