

ASTEROID

We are pleased to announce the release of the all new Asteroid antenna. This is a high performing, dual polarity beam that is sure to impress. Boasting 10 elements, 5 vertical and 5 horizontal, it is mounted on a 26' boom. It features a multiscreen reflector and is designed to give you the best combination of gain and front-to-back ratio.

As always, the Maco® gamma matches are fully adjustable to obtain the lowest SWR for both vertical and horizontal polarization.

Comes stock with two 2kW gammas, which can be upgraded by the customer to our 5, 10, or 30 kW gammas.

Please contact us with any questions.

((Antenna specifications on reverse))

Boom Length: 26'
Boom OD: 2"
Elements: 10
Longest Element: 17.5'
Turn Radius: 16'
Wind Load: 11.84 sq ft
Wind Survival: 90 mph
Gain: 15.5 dB
Front to Back Separation: up to 40 dB
Power Multiplication: 40X
Tuning: 10/11 Meters
Power Handling: 2kW stock (upgradable to 5,10,30 kW)
Weight: 45 lbs
Shipping Dimensions: 82" x 6" x 6"
Ships By: UPS

DISTRIBUTOR: \$406.00

DEALER: \$458.00

RETAIL: \$639.00
