# AU28 XTREME

**BIG SOUND. BOLD DESIGN**

The compact, waterproof external speaker with powerful 10W audio. Perfect for vehicles and noisy environments, including agricultural or outdoor settings. Small in size but big on performance

CB accessory

# AU28 XTREME

The **Midland AU28 XTREME** is an outdoor speaker that combines compact size with maximum sound output.

Designed for those who live and work in demanding environments, it ensures clear communications even amid noise, harsh weather, and challenging conditions.

When connected to a Midland CB with PA function (such as the Quarantotto or M5 PRO), the AU28 XTREME becomes a true external megaphone: speak into the microphone and your voice comes out of the speaker, ideal for giving immediate instructions to field operators without having to leave your vehicle.

### Description

In trucks, always clear even with the engine running

On the road, amidst vibrations and constant engine noise, the AU28 XTREME delivers powerful and crystal-clear audio. It can be easily mounted in the cabin, ensuring you catch every communication without missing important information.

On ATVs, resistant to mud and dust

Off-road trail? No problem. With IP67 certification, the AU28 XTREME withstands dust, rain, and mud splashes. Wherever your adventure takes you, you'll always have a reliable companion by your side.

On boats, ready to face wind and sea

Open waters bring noise, wind, and saltwater. This compact speaker continues to deliver loud and clear audio even in extreme conditions, so you can rely on dependable communications when you need it most.

## Technical Features

- **Clear and powerful audio**  
10W power and 8 Ohm impedance for crystal-clear sound even in noisy environments.
- **PA (Public Address) function**  
When connected to a Midland CB with PA function, it becomes an external megaphone—ideal for communicating without leaving your vehicle.
- **Compact yet extremely durable**  
IP67 certified: resistant to dust, rain, mud splashes, and temporary immersion.
- **Heavy Duty**  
Reinforced structure against shocks, vibrations, and extreme conditions: designed for professional and outdoor use.
- **Flexible mounting**  
180° adjustable bracket and 2-meter cable for flexible installation in any environment (heavy vehicles, boats, ATVs, off-road...).
- **Universal compatibility**  
Easy connection with a 3.5 mm jack: compatible with most radio devices.
- **Quick installation, no external power required**  
Ready to use: requires no complicated wiring or external power sources.

CB Accessory

# AU XTREME

**Xtreme potenza - Xtreme chiarezza - Xtreme resistenza**

**The line of external speakers designed for “beyond the limit” conditions:** noise, vibrations, water, and dust. Heavy-duty construction, IP67 protection, and 8  $\Omega$  impedance ensure a loud and clear voice where others fail.

## **AU50 XTREME — Xtreme volume.**

When more “**power**” is needed, it delivers **20 W RMS at 8  $\Omega$**  with a **20Hz–20kHz frequency response** for clear voice and music, whether in a cabin or on open vehicles. **IP67-rated construction** protects against water and dust. Dimensions: **142×129×100 mm** (with bracket) with a **180° adjustable mount** for precise positioning. Quick connection via **3.5 mm mono jack** and **2.10 m cable**.

## **AU28 XTREME — Xtreme compattezza.**

**Small on the outside, powerful on the inside:** 10 W RMS, IP67, heavy-duty construction. When connected to Midland CBs with PA function, it becomes a true external megaphone. Easy mounting with 180° bracket, 3.5 mm jack, and 2 m cable for quick installation on trucks, ATVs, boats, and off-road vehicles.
