

Mounting instruction

Aircell[®] 7, Ecoflex[®] 7

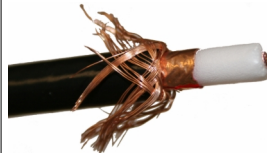

BNC plug crimp / Item no.: 7375 PRO

www.ssb-electronic.com

Required tools:	
1 x	cutter knife
1 x	scissors
1 x	crimping tool
1 x	crimp insert HEX .299" (7,6 mm)
1 x	crimp insert HEX .114" (2,9 mm)
1 x	soldering station + solder

1	
Cut off cable tail right-angled. Slide the crimp sleeve over the end of the cable.	

2	
Remove 15 mm of the outer jacket with the cutter knife.	

3	
Bend the copper braid up at a right angle. Score and remove 6,5 mm of the copper foil with a cutter knife.	

4	
Remove 4 mm of the foamed dielectric with a knife.	

5	
Push the inner pin onto the conductor and crimp with HEX 0.114 or solder through the hole.	

6	
Insert the so prepared cable end into the connector housing as far as it will go (click). Bend the copper braid forward and cut it off with scissors. Slide the crimp sleeve up to the stop.	

7	
Crimp the crimp sleeve with the crimping tool. This will clamp the copper braid between the connector housing and the crimp sleeve.
